Don't forget...

20% OFF E-PET kits - Equine Platelet Enhancement Therapy

when you buy 5 or more together

Or a **FREE E-PET*** kit for any vet who has never used it before.

(*conditions apply)

Not sure what E-PET is? It's a **quick, easy and totally portable** blood filtration system that is used to obtain a high platelet concentrate to **promote healing**. This can be used to treat many different problems including **ligament injuries and osteoarthritis**. [Click here](#) to find out more.

How to make the most of our two **Summer Special offers** at VetCell (available until 31st August 2011):

- For any vet who has never used E-PET (Equine Platelet Enhancement Therapy) before, we are offering a **free kit** so that you can try it out (conditions apply). **Limited numbers** available so don't delay, [contact us](#) today.
- Plus we also have **20% off when you buy 5 or more kits**. Just give us a ring on +44 (0)1865 922227 or send an [email to place your order](#).

New member of the team!

We are thrilled to announce that Kate Middleton has joined the VetCell team as European Client Manager. She has a wealth of equine experience and has worked in the regenerative medicine field in the past so she already has an excellent understanding of our products.

We would like to welcome Kate to the team and are very much looking forward to working with her. Kate will be taking over from Minnie Parmiter as Minnie is moving to Glasgow to undertake a PhD.

Minnie will remain part of the business on a freelance basis, liaising with our Spanish-speaking customers, visiting Scottish clients and ensuring we are fully compliant with all VMD regulations.

Both Kate and Minnie will be at the BEVA Congress in September so do please visit our stand and introduce yourself (stand number 528).

Contact Kate to find out more about any of our products or to place an

StemRegen Training Day

We are running another one of our very popular training days with Professor Roger Smith. (Monday 31st October 2011 at the [Royal Veterinary College](#) Hawkeshead Campus at Hatfield, near London.)

The programme includes:

- Lectures on stem cell therapy theory and research
- Practical sessions including aspiration from the tuber coxae and sternum and stem cell implantation into cadaver limbs
- The opportunity to talk informally to Professor Smith
- An optional tour of the RVC hospital

The course is open to registered vets and counts towards CPD points.

The cost of the day, including lunch and refreshments, is £175 + VAT. For more information please [click here](#) or fill in the [application form](#) if you would like to register. If you have any questions please

order - info@vetcell.com, +44(0)1865 922227.

contact Kate on +44 (0)1865 922227 or k.middleton@vetcell.com. Places are limited so please book soon to avoid disappointment.
